

Inborn privileges

Wojciech Kałas
Institute of Immunology and Experimental Therapy
Polish Academy of Sciences
Wrocław, Poland

13 April 2021

Abstract

The presentation will be the first in a series of two lectures. Both lectures aim to be an introduction to basic concepts of immunology. The first part will present fundamental principles of the immune system. The mechanisms of inborn immunity will be discussed.

About the presenter

Dr hab. Wojciech Kałas is a molecular biologist of cancer. His work is focused on the discovery of novel mechanisms of action of antineoplastic drugs. He is the Head of the Laboratory of Tumor Immunobiology at the Institute of Immunology and Experimental Therapy, Polish Academy of Sciences. Previously he was a lecturer at Jan Długosz University in Częstochowa. He graduated from the Faculty of Chemistry at Wrocław University of Science and Technology.
